

Palliative Care

Helping you to focus on the quality of life and reduce the burden of suffering.

When someone faces a life-limiting illness, they and their loved ones need care and emotional support. Palliative care from Bayshore can:

- ~ help improve and maintain quality of life
- ~ reduce or relieve physical and psychological symptoms
- ~ help patients have a more peaceful and dignified death
- ~ provide support for family and caregivers

What is palliative care?

Provided in any setting where a patient lives or is receiving care, palliative care helps patients of all ages achieve the best possible quality of life from diagnosis to the end of life.

Focusing on open and honest communication on goals of care, psychosocial, spiritual support, and pain and symptom management, palliative care offers patients and their families a greater sense of control as they are actively involved in their own care. Identifying patient needs early, can help to anticipate, prevent and relieve suffering.

How we can help?

Bayshore nurses and caregivers provide expertise and support with symptom management, medication management, personal care, nursing and end-of-life care, tailored to meet the needs of the patient and their family.

Support is just a phone call away.
